A FULL-BLOWN INFESTATION

INTO VERY BIG PROBLEMS

ANNOYING YOUR GUESTS

DAMAGING YOUR BRAND & REPUTATION

REPRESENT POOR SANITATION

AND CAN EVEN

CREATE FOOD SAFETY RISKS

SPONGING MOUTHS

Great for mopping up biofilm (a.k.a Decaying organic material)–

and transferring pathogens

E. COLI

LISTERIA

SALMONELLA

STICKY FEET

Great for gripping smooth surfaces–

and transferring pathogens

SHIGELLA

SMALL CHANGES CAN MAKE A

BIG IMPACT

THE PROACTIVE APPROACH

EQUIPMENT & DRAINS:

Clean all drains and underneath kitchen equipment regularly.

FOOD STORAGE:

Store perishables in closed plastic tubs.

RECEIVING:

Inspect incoming goods and reject anything with signs of small fly activity or spoilage.

PLUMBING: Repair plumbing, leaking beverage lines and drain problems immediately.

RAGS & MOPS: Clean rags and mop heads before storing.

WASTE: Cover and store garbage and recycling away from the facility.

FLOORS: Replace floor tiles and missing grout; repair and seal cracks and crevices in wet areas.
