

RODENT CEILING Devices Solve A Long Term Customer Problem

Case Study – Pest Elimination

INSIGHT

An F&B customer site in New Zealand had a long history of Rodent Ceiling issue. The issue placed significant strain on their operation, their brand, and their safety. The customer was looking for a safe, innovative solution that would eliminate this issue.

SOLUTION

After a thorough inspection of the site and in collaboration with the customer, Ecolab initiated a proactive rodent ceiling service that included ceiling monitoring and elimination process undertaken by highly trained service specialists. Devices were expertly placed to ensure even coverage across impacted areas, including 'hard-to-reach' spaces. The install was conducted in a safe environment, to ensure the safety of staff at the facility and Ecolab service specialist. The device design allows for a continues safe servicing and their discreet appearance ensures the facility remains protected without drawing unwanted attention to a Pest Elimination program.

RESULT

Within a day, several rodents were captured with the trend continuing over the following weeks. Ecolab's service specialists visited the site on a regular basis and worked in close collaboration with the customer to monitor efficacy.

A long standing issue was finally being pro-actively controlled and eliminated. The customer was extremely happy and satisfied with the result.

Rodent ceiling devices together with a pro-active pest management service ensured that this F&B customer was able to focus on what really matters - their business and quality products to their customers.

RESULTS

- High capture rate over several weeks
- Long term rodent ceiling issue eliminated
- Early detection = 3x faster reduction of interior rodent activity

"Pro-active rodent ceiling services are a powerful way to deliver a pest-free environment. Almost overnight we caught several rodents "
