

Personal Belongings Preservation Service

Eliminate bed bugs and preserve your valuable room accents and personal items

A Targeted Program to Fit Your Business

Bed bugs are mobile and can often infest personal belongings. The **Personal Belongings Preservation Service** provides an innovative way to eliminate all stages of bed bugs in items that cannot be easily laundered or heat treated, without damaging the treated items. This helps save time and money spent inspecting and discarding valuable items.

- The exclusive, vapor-based treatment uses cold-pressed neem oil, a non-toxic, EPA-approved natural oil that kills bed bugs in all stages.
- Your Ecolab Service Specialist will help identify items that can be treated versus discarded.
- Applied by your trusted Ecolab Service Specialist.

Treatable Items

The Personal Belonging Preservation Service is designed to eliminate bed bugs in items that cannot easily be laundered or heat treated. Examples include:

- Books and magazines
- Electronics
- Shoes
- Purses
- Luggage (empty of contents)
- Picture frames
